<b>Notation</b>	<b>ix</b>
<b>Abstract</b>	<b>xi</b>
<b>Deutsche Kurzfassung</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Research topic overview . . . . .	2
1.2.1 Distributed MPC . . . . .	3
1.2.2 Economic MPC . . . . .	5
1.3 Contributions and outline of this thesis . . . . .	6
<b>2 Background</b>	<b>9</b>
2.1 Stabilizing MPC . . . . .	9
2.2 Economic MPC . . . . .	11
2.2.1 Average performance, optimal steady-state operation and stability . . . . .	12
2.2.2 Average constraints . . . . .	15
2.3 Summary . . . . .	16
<b>3 Distributed MPC for cooperative control</b>	<b>19</b>
3.1 Problem setup . . . . .	19
3.2 Distributed MPC schemes for general cooperative control problems . . . . .	23
3.2.1 Distributed MPC with general cost functions . . . . .	23
3.2.2 Distributed MPC with separable cost functions . . . . .	29
3.2.3 Discussion . . . . .	32
3.3 Application to consensus and synchronization . . . . .	34
3.3.1 Example - synchronization of linear oscillators . . . . .	38
3.4 Summary . . . . .	39
<b>4 Economic MPC: Dissipativity, average constraints, and self-tuning terminal cost</b>	<b>41</b>
4.1 Dissipativity in economic MPC . . . . .	41
4.1.1 Necessity of dissipativity for optimal steady-state operation . . . . .	41
4.1.2 Robustness of dissipativity under changing constraint sets . . . . .	50
4.2 Average constraints . . . . .	60
4.2.1 Economic MPC with average constraints and terminal region . . . . .	61
4.2.2 Convergence in economic MPC with average constraints . . . . .	69
4.2.3 Economic MPC with transient average constraints . . . . .	74
4.2.4 Numerical Examples . . . . .	81

4.3	Economic MPC with self-tuning terminal cost . . . . .	85
4.3.1	Problem setup . . . . .	85
4.3.2	Average performance with time-varying terminal weight . . . . .	88
4.3.3	Self-tuning terminal weights . . . . .	90
4.3.4	Discussion . . . . .	96
4.3.5	Numerical examples . . . . .	98
4.4	Summary . . . . .	100
<b>5</b>	<b>Distributed economic MPC</b>	<b>103</b>
5.1	Problem setup and distributed economic MPC scheme . . . . .	104
5.2	Convergence analysis of distributed economic MPC . . . . .	109
5.3	Application: Consensus under conflicting objective . . . . .	114
5.4	Summary and discussion . . . . .	115
<b>6</b>	<b>Conclusions</b>	<b>117</b>
6.1	Summary and discussion . . . . .	117
6.2	Outlook . . . . .	118
<b>A</b>	<b>Stability of discrete-time systems</b>	<b>123</b>
A.1	Stability and asymptotic stability . . . . .	123
A.2	Asymptotic and essential convergence . . . . .	124
<b>B</b>	<b>Nonlinear programming</b>	<b>125</b>
	<b>Bibliography</b>	<b>127</b>
