Contents

1 Introduction **1**
1.1 Motivation . . . 3
1.2 Contribution . . . 5
1.3 Overview . . . 7

2 Related Fundamentals and Approaches **9**
2.1 3D Acquisition Techniques . . . 9
2.1.1 Structured Light . . . 10
2.1.2 Time-Of-Flight . . . 12
2.1.3 Stereo Vision / Laser Range Measurement . . . 13
2.1.4 X-Ray Computed Tomography and Magnetic Resonance Imaging . . . 15
2.2 Fundamentals . . . 17
2.2.1 Basic Introduction to the Assignment Problem . . . 17
2.2.2 Basic Introduction to Graph Theory . . . 18
2.2.3 Basic Introduction to Dynamic Programming . . . 20
2.2.4 Basic Introduction to Linear Programming . . . 21
2.2.5 Basic Introduction to the Shortest Path Problem . . . 22
2.2.6 Basic Introduction to the Distance Transform . . . 25
2.2.7 Basic Introduction to the Rating of Retrieval Systems . . . 28
2.3 State-of-the-Art: Holistic View . . . 30
2.3.1 Shape and Object Recognition Approaches . . . 31
2.3.2 Vessel-based (Matching) Approaches . . . 37
2.4 State-of-the-Art: Detailed View . . . 38
2.4.1 Skeletons: Definition, Extraction and Pruning . . . 38
2.4.2 Graph Matching Techniques . . . 49
2.4.3 Matching of Time Series . . . 52

3 2D Skeleton Graph Matching for 2D Object Retrieval 59
3.1 Fundamental Concepts . . . 59
3.1.1 Discrete Curve Evolution . . . 59
3.2 Path Similarity Skeleton Graph Matching . . . 61
3.2.1 2D Object Representation by Skeleton Graphs . . . 62
3.2.2 Path Distance as Dissimilarity Measure between Points . . . 64
3.2.3 2D Object Matching Using Skeleton Graphs . . . 64
3.3 Revision of the PSSGM . . . 66
3.3.1 Strengths . . . 66
3.3.2 Restrictions & Weaknesses . . . 68
3.4 Summary . . . 72

4 2D Object Retrieval Based on Points and Curves 75
4.1 Fundamental Concepts . . . 76
4.1.1 Douglas-Peucker Algorithm . . . 76
4.1.2 Fourier Transform - A Brief Introduction . . . 77
4.2 Contour Partitioning . . . 78
4.3 Contour Curve Segment-driven Feature Generation . . . 85
4.3.1 The Point Context Shape Descriptor . . . 86
4.3.2 The Contour Segment Shape Descriptor . . . 87
4.4 Object Matching Based on Points and Curves . . . 89
4.4.1 Graph Matching by the Hungarian Method . . . 89
4.5 Summary . . . 93

5 3D Object Recognition Based on 3D Curves 95
5.1 Fundamental Concepts . . . 96
5.1.1 Random Sample Consensus Method . . . 96
5.2 Scene Analysis and 3D Curve Recovery . . . 97
5.2.1 Scene Analysis Concerning 3D Object Detection and Extraction . . . 98
5.2.2 3D Object Representation by 3D Curves . . . 99
5.3 Feature Detection Using a Local Coordinate System . . . 100
5.3.1 Estimation of an Intrinsic Object Coordinate System . . . 100
5.3.2 Detection of Object Characterising Feature Points . . . 103
5.4 Shortest Path Computation . . . 107
5.4.1 Geometry-driven Establishment of Feature Networks . . . 109
5.4.2 Extended Dijkstra Implementation Operating on Feature Networks . . . 111
5.5 Path Descriptor Based on Relative Angles . . . 113

5.6 3D Object Retrieval . . . 116
5.6.1 Feature Point Ordering Scheme . . . 116
5.6.2 Maximum Weight Cliques . . . 118
5.7 Summary . . . 120

6 Abdominal Aorta Registration 123
6.1 Fundamental Concepts . . . 125
6.1.1 Introduction to the level set Method . . . 125
6.1.2 Introduction to the *k*-Means Clustering Approach . . . 132
6.2 Segmentation of the Aorta, the Kidneys and the Spine . . . 133
6.2.1 Segmentation of the Abdominal Aorta Using Active Contours . . . 133
6.2.2 Segmentation of the Kidneys and L4 of the Lumbar Spine . . . 135
6.3 Skeleton Extraction from the Aorta's Vascular Structure . . . 139
6.4 Abdominal Aorta Registration . . . 146
6.4.1 Intrinsic and Extrinsic Feature Extraction . . . 146
6.4.2 Skeleton Matching for the Purpose of Registration . . . 148
6.5 Summary . . . 151

7 3D Object Retrieval Based on Curve Skeletons 155
7.1 Fundamental Concepts . . . 156
7.1.1 Feature Transform . . . 156
7.1.2 The Cosine Similarity Measure . . . 156
7.2 3D Object Skeletonisation Based on Jordan Curves . . . 157
7.2.1 Tolerance-based Feature Transform . . . 158
7.2.2 Skeleton Extraction by Determining Jordan Curves . . . 158
7.2.3 Skeleton Extraction on Discretised 3D Objects . . . 160
7.2.4 Quality Assessment of the Skeletal Structure . . . 162
7.3 Topological-Based Feature Set by Curve Skeletons . . . 163
7.4 Skeleton Adaptations for the Purpose of Feature Generation . . . 165
7.5 Summary . . . 167

8 Experiments and Results 171
8.1 2D Object Retrieval Based on 2D Skeletons . . . 171
8.1.1 Evaluation Setup . . . 171
8.1.2 Evaluation Results . . . 172
8.2 2D Object Retrieval Based on 2D Points and Curves . . . 177
8.2.1 Evaluation Setup . . . 177

8.2.2 Evaluation Results . . . 178
8.3 3D Object Retrieval Based on 3D Curves . . . 181
8.3.1 Evaluation Setup . . . 182
8.3.2 Evaluation Results . . . 183
8.4 3D Aorta Registration Based on 3D Curve Skeletons . . . 187
8.4.1 Evaluation Setup . . . 187
8.4.2 Evaluation Result . . . 190
8.5 3D Object Retrieval Based on 3D Curve Skeletons . . . 192
8.5.1 Evaluation Setup . . . 193
8.5.2 Evaluation Results . . . 194

9 Summary, Conclusion and Outlook **199**
9.1 Summary . . . 199
9.2 Conclusion . . . 202
9.3 Future Work . . . 203

Abbreviations **207**

Symbols **211**

List of Figures **217**

List of Tables **227**

Bibliography **229**

Own Publications **243**
